

## Hundred letters

When we were one hundred letters old  
all the stories and tales were told  
the love, the attraction, the thrill all sold  
and the desire for freedom starts to unfold

Hundred letters - an entire book  
telling it all - the way you took,  
what happened, who came to look,  
at times even suggesting what to cook

Life goes on, beyond one hundred letters  
they lie forgotten, dry the feather  
that, thought after thought, faster and better,  
hastily completed the hundredth odd letter.
